

Useful functions

Viewing program details

While watching a program or selecting a program to watch from the EPG or list...

When you want to see details of the program indicated by the icon

Press **赤** (Red) or **青** (Blue). (Returns to the program details.)

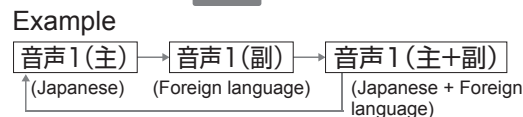

Switching audio

For multi-language broadcasts (dual language broadcasts, multiple languages)...

Press **音声切換** (Audio Switch)

- The audio changes each time the button is pressed.

Dual audio (Includes one main and one sub audio channel)

Multi-Audio (Includes multiple audio channels)

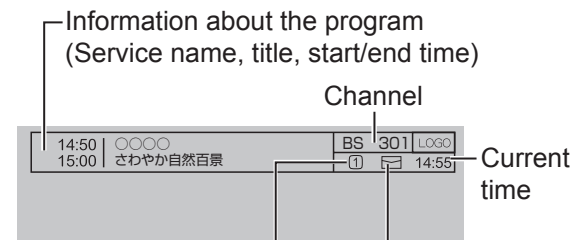

Information

- Some broadcasts may have the foreign language on the “主” (Main) and Japanese on the “副” (Sub) channel.

Displaying program titles etc.

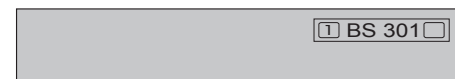

While watching a program...

Press **画面表示** (Screen Display)

Remote control buttons **1あ** to **12じ** (Blank at all other times)

After a short time...

Press **画面表示** again and the display disappears.

Watching data broadcasts

While watching digital broadcasts...

- Press **データ** (Data)
 - It may take time to display if there is a lot of information.
 - Some programs do not have data broadcasts.

Select the item you want to see using **▲▼◀▶**, and press **決定** (Enter)

- Use the color buttons in the EPG to display special selection screens or number input screens. Follow the on-screen instructions.

Press **データ** again to return to the television broadcast.

Information

- There is a dedicated channel for data broadcasting only. (You can view by selecting channels as normal.)

Quick Guide

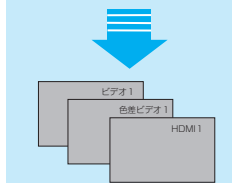

CATV Digital Set Top Box TZ-LS300 Series TZ-LS200 Series
